taught by Vossler.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grudinin et al. (US2003/0021302) in view of Vossler et al. (US5408492).

With respect to claim 1, Grudinin show in Fig.11 a method, comprising: directing a first optical beam of a first wavelength and a first power level 1480nm into a first ring resonator 14; causing emission of a second optical beam of a second wavelength 1240nm in the first ring resonator by propagating the first optical beam around the first ring resonator, wherein the first power level is sufficient to cause the emission of the second optical beam; and directing the first optical beam 1480nm out of the first ring resonator after a round trip of the first optical beam around the first ring resonator, and recirculating the second optical beam around the first ring resonator. Grudinin lack a semiconductor material. Vossler teach in Fig. 1 a semiconductor material substrate 100. For the motivation of supporting the ring resonator (col.3, 1.55-56) and providing desirable electro-optic properties in the ring (col.4, 1.5-7), it would have been obvious to one

having ordinary skill in the art at the time the invention was made to provide Grudinin what is

Art Unit: 2828

With respect to claim 7, Grudinin disclose the Raman scattering (SRS) (para.0156, 1.6).

With respect to claim 8, Grudinin disclose the Stokes frequency (Para.0156, 1.5).

Allowable Subject Matter

Claims 2-6 and 9-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 11-30 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claims 11 and 22 are allowed over the Grudinin and Vossler prior art because they fail to teach, taken singly or combined, the limitation of a first ring resonator defined in the semiconductor material with the second output of the first optical coupler optically coupled to the second input of the first optical coupler through the first ring resonator, the first optical coupler to transfer a first optical beam of a first wavelength having a first power level received at the first input of the first optical coupler to the second output of the first optical coupler, the first optical coupler to transfer the first optical beam received at the second input of the first optical coupler to the first optical coupler, wherein the first power level is sufficient to cause emission of a second optical beam of a second wavelength when the first optical beam is propagated in the first ring resonator, the first optical coupler to transfer most of the second

Art Unit: 2828

optical beam received at the second input of the first optical coupler to the second output of the second optical coupler.

Claims 12-21 and 23-30 are found allowable due to their dependency of claims 11 and 22.

Communication Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung (Michael) T Nguyen whose telephone number is (571) 272-1949. The examiner can normally be reached on 8:30 - 17:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Min Harvey can be reached on (571) 272-1835. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 306-3329.

Michael Dung Nguyen
